PROFESSIONAL SUMMARY

React Frontend Engineer with hands-on experience building enterprise dashboards, healthcare platforms, CRM systems, and business websites using React, TypeScript, JavaScript, and modern frontend technologies. Experienced in creating reusable components, integrating REST APIs, implementing authentication and role-based access, and collaborating with ASP.NET Core backend teams to deliver reliable production features. Strong focus on responsive design, performance, maintainability, and clean architecture.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Angular, HTML5, CSS3, Responsive Design, Vite, React Hooks	Backend Integration: ASP.NET Core, REST APIs, JWT, Entity Framework Core, Dapper, SignalR
State & Architecture: Reusable Components, Component-Based Architecture, Authentication, Authorization, Clean Code	Database & Tools: SQL Server, Firebase, Git, GitHub, Azure DevOps, Jenkins, Postman, VS Code, Visual Studio, Rider

SELECTED PROJECTS

Radiology Management Platform

React Frontend Engineer | Healthcare Management System

React • TypeScript • ASP.NET Core • SQL Server • Firebase • REST APIs • JWT | [Live Website](#)

- Developed a multi-role healthcare platform used by administrators, reception staff, laboratories, pharmacies, insurance providers, and doctors.
- Built responsive dashboards and reusable components for appointment scheduling, patient management, medical reports, invoices, and operational workflows.
- Integrated ASP.NET Core REST APIs and implemented JWT authentication with role-based authorization.
- Improved usability and frontend performance while collaborating with backend developers and business stakeholders.

Elite Coach CRM

React Frontend Engineer | Fitness CRM Platform

React • TypeScript • ASP.NET Core • SQL Server • JWT | [Live Website](#)

- Developed a CRM platform for fitness coaches to manage clients, intake forms, workout plans, nutrition programs, subscriptions, and progress tracking.
- Created reusable React components and responsive dashboards for both coach and client workflows.
- Integrated secure REST APIs, authentication, and protected routes across the application.
- Contributed to frontend and backend implementation to turn business requirements into production-ready features.

DOC WAY Healthcare Platform

Frontend Developer | Healthcare Marketplace

Angular • ASP.NET Core • SQL Server • REST APIs

- Developed marketplace modules connecting patients, pharmacies, laboratories, and healthcare providers.
- Built administrative dashboards and responsive interfaces for medicine requests, contracts, customer management, and operational workflows.
- Integrated Angular screens with ASP.NET Core APIs and handled validation, data display, and user interactions.

Gossor Translation

React Frontend Developer | Multilingual Corporate Website

React • JavaScript • Responsive Design • SEO | [Live Website](#)

- Developed a multilingual corporate website with reusable React components and responsive layouts.
- Improved page structure, usability, performance, and SEO for a professional business presence.

ADDITIONAL EXPERIENCE

Laboratory Management System — ASP.NET Core, Angular, SQL Server | **Fingerprint Attendance Application** — Angular | **Pharmaceutical Factory ERP** — stock, customers, machines, shortages, accounting, and user roles | **Dental Clinic Management System** — React, TypeScript, C#

EDUCATION & ADDITIONAL INFORMATION

Bachelor of Arts — English Language & Translation Tanta University 2019–2023	Military Status Completed
